

Siddhika Rathore

Computer Science Engineering Undergraduate | Software Developer | Salesforce & Blockchain Enthusiast

+91 9024085771 | rsiddhika.rathore@gmail.com | LinkedIn | GitHub | Jodhpur, India | Open to Relocation

PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate (CGPA 8.80) with hands-on experience in software development, blockchain engineering, and Salesforce CRM administration. Skilled in Python, REST APIs, and object-oriented design, with a track record of building applications end-to-end. Seeking an entry-level Software Engineer, Technical Consultant, or Salesforce Developer/Administrator role.

KEY SKILLS

Software Development Life Cycle (SDLC) · Agile Methodology · Object-Oriented Programming · Data Structures & Algorithms · REST API Development · CRM Solutions · Salesforce Administration · Cloud Computing · Blockchain & Smart Contracts · Database Management (SQL) · Version Control (Git/GitHub) · Problem Solving & Analytical Thinking

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C
- **Web Technologies:** HTML, CSS, JavaScript, Responsive Design
- **Backend & APIs:** Web3.py, REST APIs, Python Scripting
- **Database:** MySQL, CRUD Operations
- **Tools & Platforms:** Git, GitHub, VS Code, Remix IDE
- **Blockchain:** Ethereum, Quorum, Solidity, Smart Contracts
- **Cloud/CRM:** Salesforce (Trailhead – Admin, Beginner), Agentforce
- **Core CS Concepts:** Data Structures & Algorithms, OOP, Problem Solving

EDUCATION

Jodhpur Institute of Engineering & Technology

August 2023 – May 2027

B.Tech in Computer Science Engineering

CGPA: 8.80

Central Academy School, Jodhpur, Rajasthan

May 2023

Senior Secondary (12th) – Science, CBSE

Percentage: 78%

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks, Object-Oriented Programming

INTERNSHIP EXPERIENCE

C3iHub – IIT Kanpur

May 2025 – July 2025

Summer Intern, Software / Blockchain Development

On-site

- Learned core blockchain concepts: blocks, hashing, smart contracts, consensus mechanisms, decentralized architecture.
- Developed and tested smart contracts using Solidity for real-world use cases such as voting and secure data storage.
- Integrated blockchain logic with backend services using Web3.py for transaction handling and data retrieval.
- Contributed to a blockchain-based e-voting system, focusing on transparency, immutability, and secure vote casting.
- **Tech Stack:** Solidity, Ethereum, Web3.py, Python, HTML, CSS

PROJECTS

Blockchain-Based E-Voting System

Solidity, Ethereum, Web3.py

- Designed a decentralized voting platform for college-wide student body elections with secure voter registration.
- Implemented tamper-proof smart contract logic for automated, transparent vote counting.

Employee Onboarding Assistant – Salesforce + Agentforce (AI Agent)

Salesforce, Agentforce, CRM

- Built a Salesforce application that automatically creates onboarding tasks for new employees and sends reminders for pending items.
- Developed an AI chatbot using Agentforce enabling employees to ask questions and check task status in real time.

Quorum-Based Permissioned Blockchain Explorer

Quorum, Blockchain, Full-Stack

- Built a blockchain explorer with role-based access control and real-time transaction tracking.
- Implemented secure data access and event monitoring through integrated backend/frontend development.

CERTIFICATIONS & ACHIEVEMENTS

- Blockchain Technology – NPTEL
- Hyperledger Fabric for Blockchain Applications – Coursera
- Salesforce Trailhead – Admin Beginner, Expeditioner Rank
